Once the expiration of the Rights has been confirmed, the TMUSR component will be removed from the TMUS2D/all active TMUS futures deliverables.

DELIVERY SETTLEMENT AND PROTECT PROVISIONS

Option contracts which are exercised, and physically-settled security Futures contracts which mature, will require the settlement of all component securities included in the contract deliverable at the time of the option contract exercise, including rights, warrants, or similar instruments. Additional entitlements (such as due bills, eligibility to participate in tender offers, elections, etc.) may also automatically attach to securities deliverable upon option exercise. Conversely, exercised calls and or matured Futures contracts may be unable to realize the benefit of securities or entitlements **not** associated to the contract deliverable at the time of the option exercise or Option contract maturity.

Except in unusual cases, securities deliverable as a result of equity option exercises and or Option contract maturity are settled through National Securities Clearing Corporation (NSCC).

Rights and obligations of Members with respect to securities settling at NSCC as a result of an option exercise/assignment are governed by the rules of NSCC. NSCC has its own rules which enable purchasers of securities to protect themselves for value which may be lost if timely delivery is not made to them of securities subject to specific deadlines, such as the expiration of a tender offer, rights offering, election, or similar event. These rules are generally called protect or liability notice procedures, and are intended to protect purchasers by binding the delivering parties to liability if such value is lost because timely delivery is

not effected. Purchasers of securities must observe the rules and procedures of NSCC to avail themselves of such protect provisions of NSCC. Questions regarding these provisions should be addressed to NSCC.

SPECIAL RISKS

Uncovered Short Obligations

Holders of assigned calls or exercised puts, and holders of short positions in physically-settled security Futures at maturity who do not possess the underlying security at the time of assignment or exercise are subject to special risk. Suspension of trading of the underlying security, inability to borrow the security, or similar events may preclude the possibility of effecting timely delivery, thereby exposing persons with an obligation to deliver to liability if timely delivery is not effected (See Delivery Settlement and Protect Provisions above).

DISCLAIMER

This Information Memo provides an unofficial summary of the terms of corporate events affecting listed options or futures prepared for the convenience of market participants.
