

#47723

DATE: OCTOBER 15, 2020

SUBJECT: ON DECK CAPITAL, INC. – DETERMINATION OF DELIVERABLE

ADJUSTED OPTION SYMBOL: ENVA1

On Deck Capital, Inc. options were adjusted on October 13, 2020 (See OCC Information Memo #47710). The new deliverable became 1) 9 Enova International, Inc. (ENVA) Common Shares, subject to adjustment as described in the Proxy, 2) Cash in lieu of 0.2 fractional ENVA shares, subject to adjustment as described in the Proxy, and 3) \$12.00 Cash (\$0.12 x 100), subject to adjustment as described in the Proxy. Settlement of the ENVA and cash components of ENVA1 options exercise/assignment activity were subject to delayed settlement.

OCC has been informed that the final merger consideration is 0.092 ENVA shares plus \$0.12 Cash per ONDK share.

OCC has not yet been informed of a price to be used in determining cash in lieu of fractional shares.

Now that the distribution ratio has been determined, OCC will require Put exercisers and Call assignees, during the period of October 13, 2020 through October 15, 2020, to deliver the appropriate ENVA share amount.

Terms of the ENVA1 options are as follows:

New Deliverable Per Contract: 1) 9 Enova International, Inc. (ENVA) Common Shares

2) Cash in lieu of 0.2 fractional ENVA shares

3) \$12.00 Cash (\$0.12 x 100)

STRIKE PRICES: Unchanged

CUSIP: ENVA: 29357K103

MULTIPLIER: 100 (i.e., a premium of 1.50 yields \$150)

DELAYED SETTLEMENT

The ENVA component of ENVA1 exercise/assignment activity, which was subject to delayed settlement from October 13, 2020 through October 14, 2020, will now settle through National Security Clearing Corporation (NSCC). OCC will continue to delay the cash portion of the ENVA1 deliverable until the cash in lieu amount is determined. Upon determination of the cash in lieu amount, OCC will require Put exercisers and Call assignees to deliver the appropriate cash amount.

PRICING

Until the cash in lieu amount is determined, underlying price for ENVA1 options will be determined as follows:

$$ENVA1 = 0.092 (ENVA) + 0.12$$

For example, if ENVA closes at 17.29 the ENVA1 price would be calculated as follows:

$$ENVA1 = 0.092 (17.29) + 0.12 = 1.71$$

DISCLAIMER

This Information Memo provides an unofficial summary of the terms of corporate events affecting listed options or futures prepared for the convenience of market participants. OCC accepts no responsibility for the accuracy or completeness of the summary, particularly for information which may be relevant to investment decisions. Option or futures investors should independently ascertain and evaluate all information concerning this corporate event(s).

The determination to adjust options and the nature of any adjustment is made by OCC pursuant to OCC By-Laws, Article VI, Sections 11 and 11A. The determination to adjust futures and the nature of any adjustment is made by OCC pursuant to OCC By-Laws, Article XII, Sections 3, 4, or 4A, as applicable. For both options and futures, each adjustment decision is made on a case by case basis. Adjustment decisions are based on information available at the time and are subject to change as additional information becomes available or if there are material changes to the terms of the corporate event(s) occasioning the adjustment.

ALL CLEARING MEMBERS ARE REQUESTED TO IMMEDIATELY ADVISE ALL BRANCH OFFICES AND CORRESPONDENTS ON THE ABOVE.
